- Proven software development experience and Web application development skills.
- Proficient knowledge of a server-side programming language.

Technical Skills:

Version control system	: Git, Git hub, SVN
Programming Languages	: Java, Spring boot
CI/CD	: Jenkins
Build Tool	: Maven
Web Technologies	: Angular, Html, css
Webservers	: Apache tomcat, HTTP
Database	: MySQL, PostgresSQL
Containerization Tools	: Docker
Cloud Technologies	: AWS EC2 Instance
IDE Tools	: Eclipse, IntelliJ, NetBeans, Maven

Academic Qualification:

- Bachelor's in computer application from GLOCAL University, Saharanpur in 2017.
- INTER- Narayana Junior college from Nellore in 2012.
- 10th Saibaba high school from Kadapa in 2010.

Projects Experience

Project # 1

Job Role – As 'Java Backend Developer'

About Project – Self Service Portal

Project Duration: Dec-2021 to Apr-2023

Roles and Responsibilities:

- Created end point rest API for services using Spring Boot.
- Involved production supporting work worked under Agile Scrum Methodology
- Have an overview, understanding about different features of Angular like dependency injection and two- way data binding.
- Used Http services & pagination.
- Involved in development, design, and implementation of front-end part of the application.
- Identify production and non-production issues.
- Recommend changes to improve established java application processes
- Develop system designs for application development
- Develop application codebase for java programs
- Used UI Router for implementing routing in the application. Client interaction and Analysis, design of the solution
- Involved in deployment process.

Project # 2

Job Role – As ‘Java Backend Developer’

About Project – DXL

Project Duration: Mar-2020 to Dec-2021

Roles and Responsibilities:

- created end point rest API for services using Spring Boot.
- Involved production supporting work worked under Agile Scrum Methodology
- Have an overview, understanding about different features of Angular like dependency injection and two- way data binding.
- Used Http services & pagination.
- Involved in development, design, and implementation of front-end part of the application.
- Identify production and non-production issues.
- Recommend changes to improve established java application processes
- Develop system designs for application development
- Develop application codebase for java programs
- Used UI Router for implementing routing in the application. Client interaction and Analysis, design of the solution

Declaration:

I hereby declare that the above furnished details are true to the best of my knowledge and belief
